

Sam Reynolds

CLINIC

You and your care team are finishing up for the day and going over tomorrow's appointments with Dr. Kahn. You volunteer to take the first appointment of the day: Samantha Reynolds, a 40-year-old woman with worsening left shoulder pain. She is a new patient to this clinic, and you see that she submitted an electronic pre-visit form that is available in the EMR.

MEDICATIONS

- None.

ALLERGIES

this QR code.

PREVENTIVE MEDICINE

- Last received vaccines approximately 2 years ago at a free clinic provided to unhoused individuals—she doesn't remember which vaccines.

HABITS

- Smokes cigarettes ½ pack per day. Negative for alcohol intake.

FAMILY HISTORY

- No information provided.

SOCIAL HISTORY

- Samantha is divorced and unhoused.
- She works part-time as a cashier at a gas station.
- She is uninsured.
- Her highest level of education is high school.
- She considers herself asexual and prefers the pronouns she/her.
- She does not identify with any religion. English is her primary language.

Note for Preceptors

- This patient will be challenging. This may be the first time that students have encountered a patient who is not cooperative. This is an intentional design of this activity.
